paperback. Book Condition: New. Ship out in 2 business day, And Fast shipping, Free Tracking number will be provided after the shipment. Paperback. Pages Number: 322 Publisher: Hunan Science and Technology Press Pub. Date :2009-07-01. Throughout the history of mathematics. such an important and valuable mathematical problems and countless others. We want to introduce the book is from algebra. geometry. graph theory. number theory pick out six of these classical mathematical problems. In the first chapter. we introduce the radical solution of the problem of polynomial equations. This issue is related to the central issue of algebra - solving equations. Through the introduction of this issue. we will see how algebra problem with this research one step to develop. We will also see the final solution to the problem is. in turn algebra lead a new direction. In the second chapter. we introduce three geometric problems. namely. angle trisection by ruler. times the cube. square the circle. This problem belongs to plane geometry. The problems have to order one of analytic geometry as a tool. Therefore. in this chapter we will briefly analytic geometry. In the third chapter. we introduce the Euclidean fifth postulate problems. This issue also from the Euclidean plane geometry. but it s the end result of 2.000 years has led to the creation of non-Euclidean geometry. We will also see the production of non-Euclidean geometry the importance of mathematics and its application in the theory of relativity. In the fourth chapter. we introduce four-color problem. This problem belongs to topology. or more precisely that part of graph theory. We will see. the game was born in math topology and graph theory with four-color problem is how to research and further development. The final four-color theorem proof computer. but also raised the specter of mathematical proof and other...
