Brand New Book ***** Print on Demand *****.Excerpt from *The General Principle of Relativity: In Its Philosophical, and Historical Aspect* It may seem a bold undertaking on the part of one who can claim no acquaintance with the higher mathematics and no familiarity with the experimental work of the physical laboratory, to propose to interpret a principle which is the practical concern only of the mathematician and physicist. It needs no apology, however, for though the principle of relativity has been formulated by mathematicians and physicists purely as a working principle in mathematics and physics, the particular concepts with which it deals - space, time and movement - are metaphysical, and the essential concern of philosophy. In this account of the principle of relativity I have dealt only with the philosophical and historical aspect of the problem. I have tried to expound the reformed concepts of space and time and movement which are the justification and the foundation of the new working formulae.
