Reviews

I just started off reading this article pdf. It is probably the most remarkable ebook we have go through. It is extremely difficult to leave it before concluding, once you begin to read the book.
(Jeanette Kreiger)

PROCEEDINGS OF THE AMERICAN ACADEMY OF ARTS AND SCIENCES VOLUME 23

RareBooksClub. Paperback. Book Condition: New. This item is printed on demand. Paperback. 118 pages. Dimensions: 9.7in. x 7.4in. x 0.2in. This historic book may have numerous typos and missing text. Purchasers can download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1888 Excerpt: . . . met with unsatisfactory results. Good sound was not transmitted except under heavy pressure, and all attempts to obtain satisfactory measurements failed on account of the well-known disturbances set up in the microphone by the current itself. In certain of our experiments the resistance of the primary circuit was diminished by joining a number of cells in parallel. The uniform result was, that the sound transmitted was louder. The results of our experiments may be summed up as follows: --The resistance of the primary circuit, and especially that of the battery, should be as low as possible; the pressure at the contact should be no greater than is required to transmit good sound, --that is, it should be a little greater than that required to give the maximum current; with the present form of Blake contact, no electro-motive force greater than 2 volts should be used; and, finally, the contact should be carefully guarded against jarring. Our work should be considered, not as a complete investigation, but as part of the foundation for future work in the Rogers Laboratory; for our results have been more in the invention of methods than in the use of them. We trust that the work in which we have had a share may be successfully carried out in the future. Rogers Laboratory Of Physics, January, 1888. XVI. CONTRIBUTIONS FROM THE PHYSICAL LABORATORY OF THE MASSACHUSETTS INSTITUTE OF TECHNOLOGY. XXX. --BOILING POINTS OF NAPHTHALINE, BENZOPHENONE, AND BENZOL UNDER CONTROLLED PRESSURES, WITH SPECIAL...
