GEOLOGICAL SURVEY WATER-SUPPLY PAPER VOLUME 1544

To download **Geological Survey water-supply paper Volume 1544** eBook, you should refer to the button under and download the document or gain access to other information that are related to GEOLOGICAL SURVEY WATER-SUPPLY PAPER VOLUME 1544 book.

RareBooksClub. Paperback. Book Condition: New. This item is printed on demand. Paperback. 92 pages. This historic book may have numerous typos and missing text. Purchasers can download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1961 Excerpt: . . . to apply the full head. According to Lewis (1937), the duration of testing also depends upon the information desired. Most infiltration tests are of short duration to simulate the effects of rainfall or the application of irrigation water. Even then, the rate usually decreases with time of application. It seems to be the opinion of investigators that when the rate of infiltration is low a correction must be made for the evaporation rate during the test, or the evaporation must be minimized by covering the water surface with a film of oil or a monomolecular film of a waxy alcohol, such as hexadecanol or octadecanol. If infiltrometer rings are used, a cover may be installed to reduce evaporation virtually to zero. The infiltration rate is influenced also by plant and animal action in the sediments. Decaying roots leave channels throughout the root zone. Roots extend to considerable depths, some reaching 10 feet or more, according to the type of vegetation. Certain animals, such as gophers and earthworms, may considerably increase the permeability of the soil and, hence, the infiltration rate. However, the converse may be true, especially above a depth of 2 to 3 feet in the soil zone, where some decrease in infiltration rate may result from the growth of micro-organisms. To overcome growth of micro-organisms, 20 ppm (parts per million) of mercuric chloride is sometimes added to the water used for the test. The amount of activity by micro-organisms is not great in arid regions. Desiccation structure in the...
